Profile

An enthusiastic and dedicated ICT undergraduate at the University of Kelaniya with a strong passion for web development, application development, and software engineering. A reliable team player who adapts well to challenging environments and works effectively both independently and in teams. Capable of troubleshooting technical and software-based problems, with a continuous drive to learn and build impactful real-world solutions.

Education

Bachelor of Information and Communication Technology (Hons)

Faculty of Computing and Technology, University of Kelaniya
July 2024 – Present

GCE Advanced Level

B/ Haputale Tamil Central College · 2022
ICT – A | Engineering Technology – B | Science for Technology – B

GCE Ordinary Level

B/ Uva Science College · 2019
ICT – A, Mathematics – A, Science – A, English – A,
History – A, Sinhala – A, Islam – A, Tamil – B

Academic Projects

Easy Assist – Website Recommendation Platform

— *Web Development · HTML · CSS · JavaScript*

Developed a web platform to help users discover reliable websites across various product categories. Features include search, categorized listings, and an admin dashboard with user approval system. Built with a focus on usability, structured design, and scalable architecture.

Soldi – Investment-Based Installment Platform

— *Web Development · HTML · CSS · JavaScript*

Developed a web platform connecting investors with customers seeking financial support for purchasing goods. Implemented a system for funding requests, investor contributions, and structured installment repayments with profit-sharing.

Line Following Robot (Non-Programmed)

— *Hardware · Circuit Design · Sensors*

Designed and built a compact line-following robot using transistors, resistors, and logic ICs without any programming. Implemented hardware-based control logic for real-time path tracking. Demonstrates strong understanding of analog and digital electronics.

Certifications & Courses

- AutoCAD 2022 Course — Zonal Information and Communication Technology Education Centre
- Graphic Designing Course — Zonal Information and Communication Technology Education Centre
- Web Designing Course — Zonal Information and Communication Technology Education Centre

Career Objective

To become a professional Software Engineer specializing in web and application development, contributing to impactful technology products while continuously learning and growing in the ICT industry.
